WORK EXPERIENCE

Software Developer
BlackSilicon Limited
2021 - current Remote

- Developed and maintained responsive web applications, encompassing over 100+ components, showcasing expertise in UI/UX design and improving user engagement.
- Harmonizing front-end design implementation and development responsibilities, overseeing a team of 3 designers to ensure seamless integration of UI elements on the platform.
- Collaborated with designers to translate visual mockups from Figma into code for 10+ interactive websites, ensuring alignment with UX best practices and performance optimization.
- Implemented responsive design principles across web applications by following Figma specifications, resulting in stunning interfaces that enhanced overall user engagement.
- Executed rapid responsive UI designs for the project within an aggressive 2-week timeline, aligning with Figma prototypes for pixel-perfect deliverables.

Software Engineer/Code Tutor
Delight Graphic Design.
2019 - 2021   Hybrid

- Assist in development of web App using Structure language, CSS and Javascript and React application with 10,000+ users.
- Collaborated with UX/UI designers to ensure top-notch visual aesthetics of the application, leading to an average rating of 4.5 out of 5 from end users.

Web Developer/Code Instructor
TooAmple Limited.
2018 - 2019 Hybrid

- Development and implementation of a data visualization tool using ReactJS and Node.JS to present.
- Designed and developed a dynamic frontend dashboard to visualize real-time Factom coin prices using modern JavaScript frameworks like React, resulting in an improved user experience.

SKILLS

Language:
- JavaScript
- Html
- PHP
- Java&C#
- TypeScript
- SCSS / CSS

Technologies:
- React
- NextJS
- TailwindCSS
- Figma
- Vercel
- Design Systems
- Responsive development
- Framer Motion
- MDX
- NodeJS

EDUCATION

- Mastering of Computer Science: ITCareerSwitch, Codecademy and Udemy Institution,UK and USA
- Advanced Programming Diploma: University of Technology (FUTA)
- Learned about modern web technologies, scrum methodologies, and computer science fundamentals.

ACHIEVEMENTS

- Certificate of completion web development and programming fundamentals.
- Certificate of completion database structuring, PHP Advanced, and Javascript Core concepts and Advanced
- Certificate of completion Design UX/UI and Artificial Intelligence AI A-ztm.

PROJECTS

E-Commerce (Fullstack Component)
Delight graphic - full-stack Software Developer

- This project is about content management software that involves several key steps. Firstly, I define the purpose and target audience to ensure the software meets user needs. Next, I design a user-friendly interface that simplifies navigation and content creation. Choose a suitable tech stack, considering factors like scalability and security. Implement core features such as content creation, editing, categorization, and version control. Integrate user roles and permissions to manage access. I incorporate search functionality and analytics to track performance. Ensure mobile responsiveness and cross-browser compatibility. Finally, test extensively for usability and bugs, then launch with thorough documentation and support resources to assist users effectively. Continuous updates will enhance performance and user experience.

Real-Time SP Application
Portfolio- Web development (Full-stack Developer)

- This project is my unique and modern portfolio profile that was designed to demonstrate my coding skills.
- It was designed with HTML as the structure language, CSS as the styling language, and JavaScript as the powerful language, and the project was executed and developed by me.
- See in production: https://ibrahimasiba.co.uk/

Bankist App Real-time Marketing Website
SibaTech Ltd - Frontend Software Engineer

- Implemented responsive design, real JS functionality with data, and interactive animations using ReactJS, APIs, SCSS, and Framer Motion to develop a dynamic and responsive bank marketing web application.
- See in production: https://grinard0071988.github.io/bankist-app/

Movie Site Landing Page
SibaTech Ltd - Frontend Software Engineer

- Implemented responsive design and interactive animations using ReactJS,APIs,SCSS, and Framer Motion to develop a dynamic landing page for the Movie Station.
- See in production: https://cc683cd7-4d6b-4abe-b081-e1513f7887cd-00-2l1fjsx6y8qz4.worf.replit.dev/

AJO zeal Collection
TooAmple Tech Studio - Frontend Developer

- Developed the Alliance NFT Collection project, focusing on responsive UI design and alignment with Figma prototypes.
- See in production: https://ajo.zeal.money/
